Tips To increase Speed of Android Studio:

1- Disable Useless Plugins:

Open **Preferences** -> **Plugins** and disable the following:

Android APK Support

Android Games

Android NDK Support

App Links Assistant

Editor Config

Any Language plugins

2- Increase Gradle Heap Size

Appearance & Behavior -> System Settings -> Memory Settings

Sometimes allocating too much heap is also bad.

3- Replace your HDD by an SSD.

4- Android studio needs 8 GB ram or more to function properly.
